

POWER RAKE

JULIO

70 cm

PROLINE

Made in Italy

Line dedicated to
GARDENERS
and
MAINTAINERS

In order to ensure the regeneration and warming of the lawn, in spring and autumn, it is advisable to remove the excess thatch and to vertically incise the surface layer of the soil. This operation ensures the correct oxygenation of the lawn and is carried out with the scarifier (dethatcher)

For more than 25 years Agrinova has listened to the needs of those who take care of their own land.

Thanks to this experience has found unique solutions to meet the needs of different types of lawn
